Aftermarket Logistics

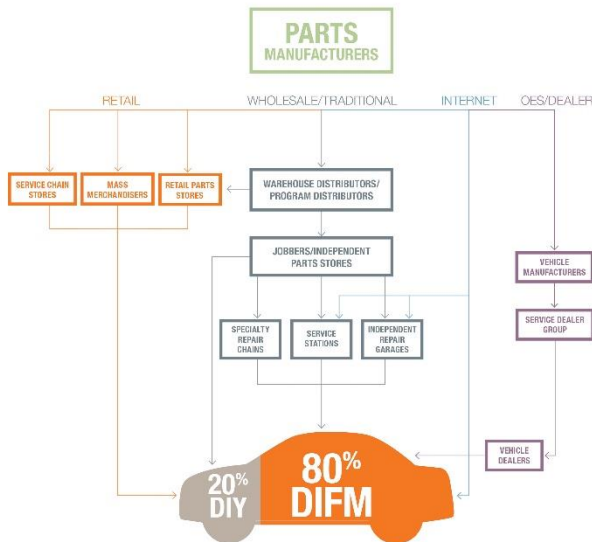

ADVANCED SCIENCE. APPLIED TECHNOLOGY.

Current Scenario

- Aftermarket companies (think of Mopar and AutoCare) are providing services and equipment that are outside of the OEM sphere
 - Following end-of-life support from OEMs
 - Adding additional functionality to a vehicle through aftermarket vendors

AUTO CARE INDUSTRY CHANNELS OF DISTRIBUTION

Points of Discussion

- Aftermarket may not have their own Primary
 - Aftermarket may be an optional supplier
 - Capable to leverage Director repository of OEM?
 - Multiple OEMs, varying levels of support
- If Aftermarket does have their own Primary, each should control a mutually exclusive set of Secondaries.
 - See <https://uptane.github.io/deployment-considerations/customizations.html>
- End-of-life Director
 - Could ownership of Director be delegated to a third party or owner?
 - Supported by existing standard?
